Interchangeable pupils simulate different levels of consciousness

Tibial IO Insertion

Automatic tongue edema

### Easy-to-use Software

Whether using the SimPad® System or PC to control SimJunior®, the software is easy and efficient to use for scenario-based education. Intuitive software allows flexible management of all patient parameters. Combined with quality educational content from SimStore™, SimJunior can be easily integrated into any pediatric training program.

### Versatile and Reliable

The SimJunior pediatric simulator allows learners to focus on a broad range of skills in order to gain exposure and practical experience in handling life-threatening pediatric problems. The interactive manikin gives immediate feedback to interventions, allowing learners to think critically and adjust their care plan accordingly.

### Immediate Debriefing

Automatic debriefing based on the event log provides immediate, detailed feedback on performance and optimizes the simulation as an educational tool.
