

SimPad System

The SimPad System is a new tool that makes simulation available at your fingertips – when and where you need it. When used to control simulations involving SimPad-enabled patient simulators, task trainers, or even standardized patients, SimPad dramatically increases the efficiency of simulation-based education. Furthermore, SimPad is backward compatible with the VitalSim platform and will take your simulation program to a new level.

200-30001 SimPad System

SimPad System Includes:

SimPad, Link Box, 2 AC Power Supplies, Lithium-Ion Battery, Wrist Strap for SimPad, Manikin Strap for Link Box, Manikin Adapter Cable (60 pin to 37 pin), SimPad Sleeve, USB Cable for attaching the Remote Control to a PC, and Directions for Use.

200-09201 12" Patient Monitor

200-09350 17" Patient Monitor

200-09401 Rugged Patient Monitor

200-11950 SimPad Patient Monitor Software Only (includes one license key)

200-11750 SimPad Patient Monitor Software Only (includes ten licenses key)

Patient Monitor Includes:

Touchscreen Patient Monitor and Software simulates several parameters including Heart Rate, SpO₂, Temperature, ECG, and many more.

200-30001 SimPad Patient Monitor Software Only (includes ten licenses key)

Running a simulation just got easier

When simulation tools are easy to use, teaching becomes more effective. The SimPad System gives you the confidence to know that you can run simulations quickly and efficiently. With its large, intuitive touchscreen design, SimPad is virtually a "Pick up and Play" experience, allowing you to easily deliver simulation-based education.

Imagine maximizing every teaching experience

The SimPad System's functionality gives you new learning opportunities. The SimPad System features an intuitive user interface including two ways to control your simulation: Automatic Mode and Manual Mode. This allows you to tailor the simulation to meet your specific needs. After your simulation session, the Log Viewer application aids in a meaningful debriefing session.

Now you'll have the ability to revitalize your current simulation program. When you can apply more relevant functionality to your existing VitalSim platform, you'll be able to maximize the potential of every simulation.

Experience a new level of simulation mobility

Picture what total mobility can do for your simulation training. With the SimPad System you'll be able to train for any situation or environment, which will enhance the learning experience like never before. This new level of mobility will make set-up time and transportation faster, easier, and more convenient. But ultimately, it's the freedom you'll have to make training more clinically relevant that will change everything.

A world of simulation in the palm of your hand

With the SimPad System, you'll have access to teaching and management resources to support your educational needs. SimPad provides access to SimCenter; a collection of specialized feature elements designed to make simulation easier, to provide validated simulation content, management tools, and assessment tools to get the most from every teaching experience.
